About This Game

Gates Of Nowhere is a Fantasy/Horror adventure for **HTC Vive** and **Oculus**.

You play as Lother, a Seeker, who is trying to recover the lost knowledge of the Alchemists. You'll be projected in a huge fantasy dungeon filled with awful and dangerous enemies, starting your adventure inside an abandoned dark prison . You must find the way out fighting to survive, solving hard puzzles, trying many different weapons to reveal at the end the mystery behind your journey.

The game has four levels, The Awakening, Through the dark, WaterWorks and Inferno, providing at least 6 hours of amazing VR gameplay.

You can try 10 different weapons, many items useful to interact with the environment and collect ingredients in order to create alchemical weapons and magic.

Incredibly funny and enjoyable game.

Bought it for a couple friends due to how affordable and worth the money the game is, and I have a blast every time I play. Looking forward to this game's future!. Its actually a trial and error game making it less action and skill based and more like a puzzle and just remembering the exact pattern of zombies that come out per level and what to do. I have no issue with that sort of game its just that this one isn't very good.

The graphics are actually pretty decent. Somehow I wanted more Gameboy jank with it as I used to spend every moment of my young childhood with the grey brick.. This game is quite different from the usual. It's a turn based RPG heavily focused in the story. The story can sometimes be quite confusing, as you play the role of a girl that lives as much in her dreams as she does in her real life. If you decide to embark in this journey, you'll find a moving and deep story that's totally worth it.

I thoroughly enjoyed this story, and even if you're not too keen on the combat style there are a few posts in the boards with builds that make it a lot easier.

So Winter Voices is not fast paced, action packed or modern looking, but for me the touching story is good enough that makes it up for it. With the game being free nowadays there is no excuse not to try it, imho.. didnt got the black mask of forest caller chief...anyone knows how to fix this?. It's pretty but it doesn't support any of the VR controllers thus you have to sit and use your keyboard and mouse to move. Also, this is one of the very few games that made me very motion sick :(I love this vintage Amtrak the locomotive drives,breaks, and looks great and so do the passenger cars and when you turn on the bell the strobe lights up top flash.I 100% recommend this train.. This is really fun. Of course it is like the game in Valve's Lab. And astonishingly the devs ommitted a few interesting things like exploding barrels and hot oil. Nobody knows why. Maybe copyright issues :-D

Still it is a nice one, although the controls are slightly worse than in Valve's game. But for whatever reason I liked this game more, I think it is because the setting. It feels right to be there on the castles's wall in the night when the monsters show up.

My daughter (8) likes it as well. She does not care much about aminig but she is quick when shooting, so she does a fairly good job and wants to play whenever possible.

So we have a lot of fun with the game and it is worth the money. If you decide to give it a try, do not give up after five minutes just because bow and arrow feel unnatural. You will get used to it ant then it really is ok.

Holy crap this game sucks. Massive amounts of eye strain and the mechanics are overly complicated. The game needs a massive overhaul on usability and the interface. It's nowhere near as good as GSB was.. I wanted to like this game, because i am a fan of the XCOM and Wasteland2 and JA2, and so on, so i bought during early access, but with playing i was waiting till the project finish.

- The first surprise the graphic: for my opinion the XCOM have better graphic, but this game need stronger VGA card, and even on full details, when you have a top-level VGA, it's not something exceptional. However, not a big issue, in tactical game not the graphic is the first.

- I don't like the bloody games, and i am not expecting a human exploding in a bloody cloud after i shot him with a pistol. There is no option to turn off the blood. At least i didn't found.

- It was annoying for me the character speeches if i misclick in combat. For example i click on an enemy who is out of shoot range, or i don't have enough AP for an action. In other games you get a message "not enough AP". In this game, the characters say a "funny" sentence. I am a bit disturbed when i click something wrong in the first hour, and they keep say "are you ♥♥♥♥ing kidding me?", "are you real?" and so on.

I am sorry i waited so much with trying the game, i thought it will be good, and i didn't want a beta experience. But i learnt an important lesson: shouldn't buy a game what you don't try ASAP, and miss the possibility for refund.. AH, Good Childhood Time. In all honesty, Hornby Virtual Railways is far better. The UI for this game is clunky, with poor tooltips and long-winded readme. For someone who just wants to get stuck in and have fun creating and designing, and eventually running a railway, this isn't the game for you. After just 1V2 hour I was so ridiculously frustrated with how things worked; I haven't played it since. Overall a waste of money.. Tried but can't get past the controls, they're just plain not fun. Bad old school feeling for me personally. Graphics, sounds and pretty much everything else great so it's a shame.. Bad controls, far from The Room.

Sigma Theory update 0.16.2.2:

Dear agents, here are the main changes for patch 0.16.2.2.

Bug fixes. Testers wanted for ROMBIE!:

Episode 2 is Live!:

Episode 2 has been live since a week ago. The Early Access now include 10 levels and several changes has been introduced. Movement steps in top-down has been increased.

There will be additional bug-fix release of what we got so far this or next week. We are also gearing up for Episode 3, which will be level 12-20.

Apart from that, we will also update the demo in the near future (which is old compared to the early access build) and we aim to release the Early Access version as well.

. Please take a minute to help me improve the game (4):

Hello guys! Once again I wanna ask you to take a couple of moments of your time and answer a couple of polls I created, to help me improve the game more.

I am still working on new game mode, along fixes and improvements for the game, but I would love to know your guys opinions.
