This game was really pointless :P. it had me get severe FPS dropdowns when using Laser or Bombs combined with other powerups

without the powerups this game would be awful!

yes, the last achievement makes you have to destroy 100 000 dots altogether, while the rest of the game can be done within 10 minutes, so I won't go there just yet

just like I haven't done the last bit on "I am Mayo" yet

not sure if 80ct - 1\u20ac is the most pointless about this game, there are tons of games that are for free and "feature" "more"

still you get a lot of yummy colour palettes and wrecking those dots with all those explosion and crusing sounds like those sound chip toys with a few buttons on them back in the late 80s .. and the chiptune music that's not even -that- annoying (the one on the trailer) encourage you to keep playing

as well as the POWERUPS do, you can easily miss a pixel and have to wildly keep swiping around with your mouse in combination with pointless clicking (like others do on other games even more? :P) the powerups will help you destroy tons of pixels, and if you have a PC (or maybe my background app's were guilty?) that's more than

1,6 GHz like the minimum req says.. not that I have a lot more, but it's pathetic (or my PC, myself or the game all along?) how my 2,3GHz Quad makes me wonder if it'll go back to normal or just freeze it all when the FPS go to 0 or negative values >.<. As stated. This game is pointless.. Opened game  
Got every achievement by opening the game

11/10

**PROS:**

**Inspired by vintage Game Boy graphics.**

**100% achievements.**

**Different power-ups.**

**You click on dots to have more dots...FUN!**

**CONS:**

**Lag AF when the screen is full of dots.**

**Only one gamemode.**

**Repetitive.**

**Pointless.**

\u2582\u2583\u2585\u2587\u2588 Final judgement: 40V100 \u2588\u2587\u2585\u2583\u2582. I finished everything this game has to offer in 40 minutes. And that was only because of the 100.000 dots achievement. Mentally I was done after 5-10 minutes. You click dots and that's the core of the game. Is it worth it over a pack of cookies? You decide. I honestly went to the store before this and my cookies weren't as expensive as this game on sale. There's better clicking games like cookie clicker and clicker heroes that are free. In my opinion this game should be free aswell. If you're struggling for money, don't buy this game. If you want easy achievements and steam cards, go ahead and buy it on sale.. Well... The game name is honest...

---

dont buy it. its name says what it is. This game is well... pointless.. "Destroyed" so many dots using the power-ups that I crashed the game. 10V10 would crash again.. Verdict: This game is a joke.

What is the point of this game? Who thought that this game would be a good idea? Why does this game even exist?

This is exactly what you're probably thinking about right now if even a shred of sanity exists in your mind. All that this game entails of is clicking an endless horde of pixels that explode in disappointing fashions. As the title suggests this game is 'Pointless' in every sense of the word and if I hadn't been given a 90% off Coupon this review would have never been created.

So please... if you somehow enjoy clicking and only clicking you will be glad to know that this title is right up your alley. If you enjoy things beyond clicking thousands of times then you should shuffle on from this page as quickly as possible as not to waste precious moments of our so very short lives.. a simple dot clicking simulator. only buy it for the easy 100%. there is no gameplay or replay potential.. another absolutley pointless clicker game that i spent my money on. I only bought it for the achievements and the badges, and i still felt like i made a huge mistake. It will take you anywhere from 45 min to an hour to get all of the achievements

-0000000000000000V10. Game is free but I still feel like I'm owed a refund.. achievements are glitched... got them all in 5 mins  
pretty bad game though
